

Guitar

Instructions

- 1 Locate a cardboard box of any size. You can use a tissue box, a shoe box with the lid taped tightly on or any other good cardboard box.
- 2 Cut an oval hole in one of the flat sides of the box (the top of the shoe box works best).
- 3 Stretch the rubber bands around the box so that they are stretched over the hole. The different-sized rubber bands will produce different notes.
- 4 To enhance the quality of the sound, place a pencil lengthwise across the box on one side of the hole so that it supports all of the rubber bands and keeps them from actually touching the edges of the hole.
- 5 Attach a paper towel tube to the top of the box to hold onto if desired.
- 6 Decorate the box to make your new guitar distinctive and show off your rock star attitude.
